

ImpressPLUS-5 Alginate

A non-chromatic alginate with extra dimensional stability for 5 days. The orange colour allows excellent contrast to evaluate the quality of the impression.

Delivery System

- Bag 450g

Presentation

REF 010/1299

Characteristics

- Class A
- Easy to mix
- Thixotropic
- Extra fast in mouth, minimum setting time 30 seconds
- Mint flavour
- Dust Free

Technical Data

Very high accuracy: 20 micron

Extra dimensional stability (120 hours/ 5 days)

High elasticity

ImpressPlus Chrome Alginate

Fast setting Chromatic alginate with colour changing from Violet through to Lilac then Green indicating the individual phases to guarantee the mixing and insertion times.

The short setting time (60 seconds) minimises any patient discomfort whilst the high elasticity and resistance to tear provide a high-definition impression.

Delivery System

- Bag 450g

Presentation

REF 010/1296

Characteristics

- Class A
- Easy to mix
- Thixotropic
- Fast in mouth, minimum setting time 60 seconds
- Mint flavour
- Dust Free

Technical Data

High accuracy: 50 micron

Delivery System

- Bag 450g

- REF 010/1295 Fast Setting
- REF 010/1294 Regular Setting

Characteristics

- Class A
- Easy to mix
- Thixotropic
- Color after setting: green
- Mint flavour
- Dust Free

Technical Data

High accuracy: 50 micron

ImpressPLUS Alginate

Mint flavoured, dust free alginate available in two settings. Fast setting (60 seconds) minimises any patient discomfort whilst the regular setting allows a longer working time to mix and load the impression tray. Both offer high elasticity and tear resistance along with high detail definition.
